

Junior 1 and 2

All areas of the National Curriculum are taught in Junior 1 and 2. Learning is interactive and continues to be personalised. The children continue to develop their numeracy and literacy skills whilst exploring the environment in which they live. Gaining a broader understanding of science, history and local and worldwide geography contributes to the children's self esteem. Their growing independence is developed as they regularly use the computer suite in small groups to learn and practise the specific technology skills which they can use in other subject and interest areas.

We know that children make rapid progress when they feel good about themselves and so we continue to help them recognise and be excited about being their "best selves" at work and play. Westbourne boys and girls know what their personal targets are and they enjoy reviewing them with their teachers and celebrating their achievement.

Children in Junior 1 and 2 are able to choose from a wider range of extended day and lunchtime activities.

Smooth transition arrangements are in place to ensure a happy progression to the next class in the new school year, knowing the teachers and routines that are familiar to them.
